EDUCATION

Bachelor of Computer Science

Dalhousie University, Halifax NS

Expected Graduation: Aug 2026

TECHNICAL SKILLS

Skills: 5+ years programming, 2 co-op experiences, 4 live websites, 8 total projects and 5 hackathons

Languages: C#, Python, SQL, Java, TypeScript, Javascript, C++, C, Rust

Frontend: React, Vue.js, Tailwind, CSS, HTML5, CSS3

Backend: ASP.NET Core, SignalR, Entity Framework, REST APIs

Databases: PostgreSQL, Microsoft SQL Studio

Tools: Git, Docker, Linux, Azure/AWS

WORK EXPERIENCE

Software Developer

Jazz Aviation – Dartmouth NS

Sept 2025 – Dec 2025

- Diagnosed and resolved bugs in a production React/ASP.NET shift bidding platform used by airline crew scheduling operations
- Participated in code reviews, Git workflows, and Agile practices as part of a professional development team

Application Developer

ImmediaC – Halifax, NS

Jan 2025 – May 2025

- Built and shipped *immediaCRI*, an internal SOP and time-tracking app adopted by the team, including API design, Identity-based authorization, and a full UI overhaul
- Contributed heavily to *Land4Homes*, a client-facing real estate platform. Implemented Vue.js components, Google Maps API integration, survey tools, PDF report generation, Azure Blob Storage, and role/permission systems
- Built an iOS app for *WithinTheHour* using Swift and Xcode, alongside backend API work
- Collaborated across Agile teams with professional Git workflows (PRs, conflict resolution, DevOps standards) and participated in client demos and feedback cycles

Student Technician

Dalhousie MedIT – Halifax, NS

Oct 2022 – Present

- Provide IT support at the Dalhousie medical campus
- Responsible for resolving hardware, software, and equipment issues at the help desk

PROJECTS

Your Academic Choice – Co-Founder & Lead Developer

React, ASP.NET, TypeScript, TailwindCSS, SignalR, PostgreSQL

www.youracademicchoice.com

- Co-founded and built a full-stack mentorship platform to connect post-secondary students with mentors – currently launching as a startup
- Architected a multi-role system (Admin, Mentor, Student) with application workflows, email verification, and role-based dashboards using ASP.NET Identity Framework
- Implemented real-time messaging with persistent storage using SignalR, and session booking with

calendar view which can be accessed directly from the messaging interface

- Integrated Twilio SendGrid for email automation and Hangfire for background job scheduling

Arcadia – Solo Project

Vue 3, Flask, WebSockets

arcadia.anthonysafatli.ca

- Built a web-based multiplayer game platform with decoupled architecture separating game logic from multiplayer/WebSocket code

Personal Portfolio – Solo Project

ASP.NET Razor Pages, SQLite, Entity Framework

anthonysafatli.ca

- Built a personal portfolio site with a project database and hidden admin section for project, resource, and message management

ScribbleR – Solo Project

React, ASP.NET API, PostgreSQL, SignalR

scribbler.anthonysafatli.ca

- Built a web-based messaging app inspired by PictoChat from the DS, with room-based instant communication using drawing

ACTIVITIES & OTHER

Game Jams & Hackathons

Jan 2023 – May 2026

- Completed 5 game jams at Dalhousie
- Participated in the Global Game Jam (x3), NASA Space Apps Challenge, and XP Game Jam
- Visit github.com/stars/AnthonySafatli/lists/hackathons to view repositories

Phi Delta Theta – Community Service Chair

Mar 2025

- Organized and led 2 community service events for the chapter

Dalhousie Linux Society – Founding Member

Sept 2023

- Helped found the Dalhousie Linux Society with classmates
- Run Arch Linux on my personal machine

Teen SOYO / YAM Youth Groups – Volunteer

Sept 2017

- Active in the church community and volunteer with the youth program
